## **INTRASYSTEMS COMPANY PROFILE**

**INTRASYSTEMS** is a team of talented experts engaged in the field of system integration and top-professional implementation of innovative IT projects of various degrees of complexity.

**INTRASYSTEMS** announced itself in the high-end market in the field of IT in 2016, pursuing to provide its customers' business with a reliable, efficient and up-to-date foundation of IT infrastructure.

**INTRASYSTEMS** provides a wide range of comprehensive services for the full lifecycle of IT projects subject to the international standards: consulting, analysis and design, IT audit, IT infrastructure modernization and development, business application implementation, security solutions, information automation and management, professional support service.

### **BASIC PRINCIPLES OF COMPANY'S ACTIVITIES:**

#### **COMPETENCE AND INNOVATION**

- **INTRASYSTEMS** actively grows, attracting to its team the best, talented and experienced professionals. Our experts constantly upgrade their skills and level of proficiency, confirming the results with successful certification and the wide range of specializations from the worldwide IT market leaders.
- We catch on the advantages of innovation, keep track of new IT industry trends, follow the best IT practices, and constantly contribute to the development of new competencies and the creation of our own solutions. Technologies keep changing faster and faster, and in order to take the dominant position for our clients' business, we always take a fresh look at the solution of any task.

#### **FOCUS ON CUSTOMER**

- The in-depth study and the broad understanding of the client's business coupled with the accumulated industry expertise are our strong suit. The open and transparent customer's relationship management system makes it possible for us to detect new demands and distribute clients' business owing to the development and introduction of brand new types of services.
- **INTRASYSTEMS** possesses its own Cloud resource and a demonstration laboratory. Thus, this allows us to test the functionality, performance, and compatibility of different IT solutions and guarantee the best reliability and efficiency in actual practice.
- **INTRASYSTEMS** is qualified as a Service Partner of numerous vendors and provides the 24/7/365 support of the implemented solutions. To ensure the fastest possible handling of incidents, the company has the Call Center and the dedicated technical support line - Service Desk.

#### **PARTNERSHIP WITH LEADERS**

- An official partnership with leading IT vendors is a foundation for **INTRASYSTEMS'** activities. The company possesses the partner statuses and competences of more than 40 vendors: IBM, Oracle, Cisco, SAS, VMware, APC by Schneider Electric, Akamai, HPE, McAfee, Citrix, Forcepoint and others. The range of their solutions and quality assurance helps to satisfy the most exacting market demands, offering comprehensive, efficient, optimal, and industry's best IT solutions.

#### **RESPONSIBLE BUSINESS**

- Since its incorporation, **INTRASYSTEMS** has bound itself to run an honest and reliable business and be responsible to its clients, contractors, employees and society. The company applies the Corporate Code of Conduct, developed in line with Ukrainian legislation, and generally accepted principles and standards of business integrity.

- Legal coverage of INTRASYSTEMS` economic activity is supported by a constructing License, which is issued by the State Architectural and Construction Inspection of Ukraine, allowing to create complex engineering systems.
- INTRASYSTEMS` quality management system is supported by the certificate of the ДСТУ ISO 9001:2015 (ISO 9001:2015, IDT) of the international and national state standard.
